West Midlands Combined Authority CCTV Evaluation - Rail Stations and Car Parks
1st January – 31st December 2025
British Standard 7958 Evaluation

1.0 METHODOLOGY

In order to comply with the requirements of British Standard 7958, Closed Circuit Television (CCTV) Management and Operation – Code of Practice and the recommendations contained in Information Commissioner’s CCTV Code of Practice published in October 2014 and Biometrics and Surveillance Camera Commissioner’s ‘Surveillance Camera Code of Practice’ November 2021. West Midlands Combined Authority commissioned Plass Solutions Ltd to conduct an evaluation of the Rail Stations and car park CCTV systems that have been monitored by the CCTV Control Room for the twelve months under review.

Whilst the Information Commissioner’s CCTV Code of Practice and the Biometrics and Surveillance Camera Commissioner’s ‘Surveillance Camera Code of Practice’ mention that a review should be undertaken that assesses the effectiveness of the system, British Standards are specific in the criteria required to be covered by such an evaluation. However, the afore-mentioned Codes of Practice agree that the results of the evaluation should be publicly available.

The topics required to be covered by the British Standard are as follows:

- a) a description of the scheme and the geographical area(s) of operation the schemes policy statement
- b) the purpose and scope of the scheme
- c) any changes to the operation or management of the CCTV scheme
- d) any changes that have been made to the policy
- e) any proposals to expand or reduce the operation of the scheme
- f) the aims and objectives for the next 12 months.

The British Standard also requires the following information to be included within the evaluation:

- a) the number of incidents recorded by the scheme
- b) the number of incidents reported to the police and where appropriate other bodies
- c) an assessment of the CCTV scheme’s impact on crime levels and types of crime in the area covered by the scheme.

As the West Midlands Combined Authority CCTV Control Room is accredited to the above mentioned British Standard and the Biometrics and Surveillance Camera Commissioner’s ‘Surveillance Camera Code of Practice’, the following evaluation will focus on the content of that Standard and the Code of Practice as outlined above.

West Midlands Combined Authority CCTV Evaluation - Rail Stations and Car Parks
1st January – 31st December 2025
British Standard 7958 Evaluation

2.0 INTRODUCTION

By 1992, crimes affecting the travelling public on some railway stations and car parks in the West Midlands had reached substantial levels. The seriousness and regularity of these incidents began to have an impact on the perception of crime on the railway network and in turn this was beginning to undermine the confidence of passengers.

In the early part of 1992, as a result of these high levels of crime, a working party commenced a feasibility study into the installation of Closed Circuit Television into the most seriously affected rail stations and car parks. The decisions were based upon crime analysis supplied by the British Transport Police and consultations with Police, passengers and rail staff. The Discussion/Strategy document was completed in October 1992 and recommended the installation of CCTV on eleven of the worst affected rail stations and car parks. Installation work commenced in March 1993. The original objectives were to reduce crime by 40% to 50% and raise the perception of security on the chosen stations.

In 1994, the first full year following installation of CCTV on the eleven stations and their car parks crime decreased by 84%. This trend continued but with generally smaller decreases. Three years after installation a survey amongst rail users on the stations with CCTV showed that 76% felt safer since cameras had been installed.

It became apparent that in order to initiate the appropriate response to incidents captured by the CCTV systems, it was essential to provide constant and effective monitoring. This would assist in creating a pro-active CCTV system as opposed to the passive application the system had become. The decision was therefore taken to provide constant monitoring of the CCTV systems within a dedicated environment and on the 22nd January 2001 the Network Safety and Security Centre was officially opened.

The success of the initial CCTV schemes in reducing crime and increasing passenger confidence in safety and security, whilst recognising the potential for displacement of crime on to other rail stations, prompted the development of a strategic approach to further expansion of this technology throughout both rail and bus stations which are the responsibility of West Midlands Combined Authority.

In order to provide a more effective service a dedicated CCTV control room was constructed and monitoring of all CCTV systems commenced in May 2011. This has enabled state of the art technology to be introduced into a specially designed environment. This evaluation includes the rail stations and car parks owned by TfWM that are monitored in the West Midlands Combined Authority's Control Room.

3.0 POLICY STATEMENT AND SCHEME DESCRIPTION

3.1 Closed Circuit Television

The scheme initially comprises of cameras located in specific external and internal locations with control, monitoring and recording facilities at a dedicated control room. A problem orientated process was utilised to assess the appropriateness of CCTV in the area subject of this evaluation. The cameras have therefore been sited to capture images that are relevant to the purposes for which the scheme has been established. The purposes of the CCTV scheme are outlined later in this report. As previously mentioned the CCTV Control Room has now been moved from the previous location into a purpose design facility.

3.2 Ownership

The scheme is owned by West Midlands Combined Authority who is responsible for the management, administration and security of the system. West Midlands Combined Authority and its partners will ensure the protection of individuals and the public by complying with the Codes of Practice.

Should the public wish to make contact with the owners of the scheme they may write to:

Public Affairs
West Midlands Combined Authority
16 Summer Lane
Birmingham
B19 3SD

The above contact point will be available to members of the public during office hours. Enquirers will be provided with the relevant documentation on request.

3.3 Policy Statement

To promote public confidence by developing a safe and secure environment for the benefit of those employed, visiting or using the facilities provided by West Midlands Combined Authority.

To inspire public confidence by ensuring that all public area Closed Circuit Television (CCTV) systems which are linked to the West Midlands Combined Authority CCTV Control Room are operated in a manner that will secure their consistent effectiveness and preserve the civil liberty of law abiding citizens at all times.

4.0 THE PURPOSE AND SCOPE OF THE SCHEME

4.1 Purposes of the scheme

The following are the objectives for which West Midlands Combined Authority CCTV system was established:

- a) assist in the prevention and detection of offences
- b) reduce both the real and perceived level of crime
- c) reduce the fear of crime
- d) improve confidence in the rule of law
- e) assist in the apprehension and prosecution of offenders.
- f) gather evidence by a fair and accountable method
- g) create a safer community, improving the quality of life for all by:
 - reducing car crime
 - monitoring public disorder
 - monitoring the movement of people in emergency situations, e.g evacuation
 - providing assistance in civil claims
 - providing assistance with issues relating to public safety and health

4.2 Scope of the scheme

The cameras have been sited to capture images which are relevant to the purpose for which the schemes has been established.

The schemes will be operated fairly, within the applicable law and only for the purposes for which it is established or which are subsequently agreed in accordance with the Code of Practice.

Operators are aware of the purpose(s) for which the schemes have been established and that the CCTV equipment is only used to achieve the identified purposes.

The schemes will be operated with due regard for the privacy of the individual.

Before cameras are placed in residential areas the residents in that area will be consulted concerning the proposed system. The results of the consultation will be taken into account. The public interest in the operation of the schemes will be recognised by ensuring the security and integrity of operational procedures.

The systems will only be operated by trained and authorised personnel.

West Midlands Combined Authority CCTV Evaluation - Rail Stations and Car Parks
1st January – 31st December 2025
British Standard 7958 Evaluation

An evaluation of the schemes is carried out annually and this will be available to the public at specified locations.

West Midlands Combined Authority and partners support the individual's right to privacy and will insist that all agencies involved in the provision and use of Public CCTV systems connected to the West Midlands Combined Authority CCTV Control Room accept this fundamental principle as being paramount.

The schemes aim to provide surveillance of the public areas in order to fulfil the purposes of the schemes. The area protected by CCTV is indicated by the presence of signs. The signs are placed so that the public are aware that they are entering a zone which is covered by surveillance equipment. The signs state the organisation responsible for the schemes, the purposes of the schemes and a contact telephone number. Data will not be held for longer than necessary and disposal of information will be regulated.

The schemes are registered with the Information Commissioner. The registration number is Z5897556. The schemes will be managed in accordance with the principles of the Data Protection Act 2018, Human Rights Act 1998 and all other relevant legislation

Reviews of Data Protection and Legal requirements are undertaken annually.

4.3 Personnel

All personnel involved with the monitoring of CCTV have or are in the process of being security screened in accordance with British Standards.

4.4 Training

All employees engaged in the monitoring and operation of CCTV have or are in the process of receiving training to the standards required by the Private Security Industry Act 2001. As a further requirement of the above Act all operators will be licensed by the Security Industry Authority.

4.5 Operation of the scheme

The system is operated in accordance with a recognized Code of Practice and Procedural Manual.

West Midlands Combined Authority CCTV Evaluation - Rail Stations and Car Parks
1st January – 31st December 2025
British Standard 7958 Evaluation

4.6 Audit

As mentioned in the introduction to this report the scheme is required to be independently monitored this includes a review of the scheme's operation and working practices.

An audit has been undertaken on 22nd October 2025 prior to this evaluation report which considered the following:

- a) the level of attainment of objectives and procedures.

The level of attainment of objectives is covered in the main evaluation. The statistics relate to the 2025 period. Procedures are governed by the Code of Practice and Procedural Manual. These were reviewed and comply with relevant processes and legislation in particular the Data Protection Act 2018 and Human Rights Act 1998.

- b) random audits of the data log and the release of information

All administrative documentation, which incorporate the release of information and incident reports in connection with this scheme were examined and all appear to be completed in accordance with the Procedural Manual.

- c) the review policy

The review policy is outlined within the Code of Practice. Procedures are reviewed on an ongoing basis in order to comply with procedures and legislation.

- d) standard of costs for the release or viewing of material

The Information Commissioner confirms the cost should be free of charge. However, West Midlands Combined Authority may charge reasonable fees when responding to manifestly unfounded or excessive requests. There were no Subject Access Requests received and processed in 2025.

- e) Legislation

At the time of the above audit all legislative requirements appear compliant.

5.0 CHANGES IN OPERATION, MANAGEMENT OR POLICY

As reflected in the Code of Practice, any major changes to the Code of Practice take place only after consultation with the relevant management group and upon agreement of the organisations with a participatory role in the operation of the system.

5.1 Major changes to the code are defined as changes which affect its fundamental principles and shall be deemed to include:

- additions and omissions of cameras to the system matters which have privacy implications
- additions to permitted uses criteria e.g. purposes of the scheme
- changes in the right of access to personal data, except statutory requirements
- significant legal implications.

5.2 Minor changes to this Code of Practice are defined as operational and procedural matters which do not affect the fundamental principles and purposes; these include:

- additions and omissions of contractors
- additional clarifications, explanations and corrections to the existing code
- additions to the code of practice in order to conform to the requirements of any statutory Acts and changes in criminal legislation.

A minor change may be agreed between the manager and the owner of the system.

There have been amendments to the Code of practice or procedures during the period under evaluation and these are mainly updates to legislation and guidance.

The Code of Practice is subject to annual review. A copy of the Code of Practice can be obtained by writing to:

Public Affairs
West Midlands Combined Authority
16 Summer Lane
Birmingham
B19 3SD

6.0 PROPOSALS FOR THE SCHEMES INCLUDING AIMS AND OBJECTIVES

West Midlands Combined Authority CCTV Control Room utilises the latest technology in Closed Circuit Television. This is seen as being beneficial to all those who visit, reside and work in the area.

The aims and objectives remain the same and these are the prevention and detection of crime, to reduce the fear of crime and make the area a safe environment.

7.0 STATISTICAL ANALYSIS AND EVALUATION

In order to achieve meaningful evaluation, the CCTV scheme must be assessed against specific performance indicators which are relevant to the objectives of the scheme. This can be achieved by utilising baskets of indicators which are divided into the categories of Contextual, Key and Support Indicators.

7.1 Contextual Indicators

Contextual Indicators relate to the circumstances or background surrounding the particular initiative. In this case the purposes of the CCTV are mainly to prevent and detect crime. Indicators will include both British Crime Statistics and Police Recorded statistics for this type of crime.

7.2 Key Indicators

Key Indicators are closely related to the actual objectives of the particular initiative and attempt to measure its effect. This will include the total crime for the police area.

7.3 Support Indicators

Support Indicators are used to refute or verify the key indicators. The measurements will include the number of images seized by police which contain evidential value.

7.4 EVALUATION

7.4.1 British Crime Survey

The responsibility for the publication of crime statistics transferred from the Home Office to Office of National Statistics (ONS) in April 2012, with the year starting on 1st July and finishing on 30th June. The following information has been taken from the ONS website.

Crime against individuals and households has generally decreased over the last 10 years with some notable exceptions, such as fraud. Estimates from the Crime Survey for England and Wales (CSEW) year ending (YE) September 2025 showed that:

- There were around 9.3 million incidents of CSEW headline crime, which means there was no statistically significant change compared with the YE September 2024 survey (9.5 million incidents); CSEW headline crime includes theft, robbery, criminal damage, fraud, computer misuse, and violence with or without injury.

West Midlands Combined Authority CCTV Evaluation - Rail Stations and Car Parks
1st January – 31st December 2025
British Standard 7958 Evaluation

- Computer misuse decreased by 21% (to around 686,000 incidents) compared with last year's survey.
- There was no statistically significant change in overall theft offences; however, there was a 20% fall in domestic burglary (to 342,000 incidents) and a 16% fall in vehicle-related theft (to around 617,000 incidents).
- There was no statistically significant change in overall fraud; however, there was a 19% rise in bank and credit account fraud (to around 2.6 million incidents) and a 40% decrease in "other fraud" (to 137,000 incidents).

Experiences of domestic abuse, sexual assault, stalking and harassment from the CSEW are presented separately as prevalence estimates (the proportion of all people who were victims in the previous 12 months) in our statistics. Latest data from the YE March 2025 CSEW showed no statistically significant change in these estimates compared with the YE March 2024 survey.

Police recorded crime does not tend to be a good indicator of general trends in crime, because of changes in how crimes are recorded over time. However, it can give more insight into lower-volume, higher-harm offences that are reported to the police, including those that the survey does not cover or capture well. Data for YE September 2025 showed that:

- The number of homicides decreased by 7% (to 499 offences) compared with YE September 2024 (539 offences); this was the lowest figure since current police recording practices began in YE March 2003.
- Offences involving knives or sharp instruments decreased by 9% (to 50,430 offences) compared with YE September 2024 (55,149 offences); decreases were seen across most regions in England and Wales.
- Offences involving firearms decreased by 9% (to 4,851 offences) compared with YE September 2024 (5,356 offences); this was the lowest figure since current police recording practices began in YE March 2003.
- The number of robbery offences (82,678 offences) remained similar to YE September 2024 (82,354 offences).
- Shoplifting offences increased by 5% (to 519,381 offences) compared with the previous year (492,660 offences).

West Midlands Combined Authority CCTV Evaluation - Rail Stations and Car Parks
1st January – 31st December 2025
British Standard 7958 Evaluation

Since the mid-1990s, the CSEW has shown long-term decreases in the number of incidents of theft, criminal damage and violence with or without injury. Fraud and computer misuse estimates are only available from year ending (YE) March 2017 onwards. While the number of fraud incidents has increased with some fluctuations over this time period, there has been a general decline in computer misuse incidents.

The headline CSEW crime measure captures incidents of theft, robbery, criminal damage, fraud, computer misuse, and violence with or without injury. There were an estimated 9.3 million incidents of CSEW headline crime in the YE September 2025 survey, showing no statistically significant change, compared with the YE September 2024 survey (9.5 million incidents). Providing context from a longer time period, CSEW headline crime remains 17% lower than in the YE March 2017 survey (11.2 million incidents), when fraud and computer misuse were first included.

In YE September 2025, the police recorded 6.7 million crimes, similar to the previous year (6.7 million crimes) and up from 4.2 million in YE March 2015. Increases since YE March 2015 are largely because of changes in police activity and recording practices. While some of the rise may reflect genuine changes in trends in crimes reported to and recorded by police, these figures are largely influenced by improvements in recording standards. As a result, police recorded crime is not generally considered a reliable indicator of overall crime trends.

Further information on crime in England and Wales can be found on <https://www.ons.gov.uk/peoplepopulationandcommunity/crimeandjustice/bulletins/crimeinenglandandwales/yearendingseptember2025>

7.4.2 West Midlands Police crime and offence statistics

As previously mentioned, contextual performance indicators are closely related to the background and environment of the particular initiative, it is therefore advantageous to examine the context in which the cameras operate. This will include the total crime for the police area. There is an argument that the number of recorded offences would be reflected in the levels of incidents created by the CCTV operators.

During 2021 the recorded crime had increased by 22%. There was an increase in Public Order (+66%), Weapons (+61%), Violence (+49%), Criminal Damage/Arson (+48%), Other Crime (+41%), Drugs (+24%), Other Theft (+7%), Bike Theft (+4%) and Robbery (+1%). Decreases were recorded in Burglary (-19%), Anti-Social Behaviour (-16%), Vehicle (-5%), Theft from a Person (-3%) and Shoplifting (-3%).

West Midlands Combined Authority CCTV Evaluation - Rail Stations and Car Parks

1st January – 31st December 2025

British Standard 7958 Evaluation

During 2022 the recorded crime had increased by 8%. There was an increase in Other Crime (+1043%), Shoplifting (+42%), Drugs (+29%), Public Order (+29%), Violence and Sexual (+19%), Criminal Damage/Arson (+13%), Vehicle (+2%) and Bike Theft (0%). Decreases were recorded in Other Theft (-14%), Weapons (-21%), Burglary (-36%), Robbery (-40%), Anti-Social Behaviour (-66%) and Theft from a Person (-67%).

During 2023 the recorded crime has decreased by 5%. There was an increase in Shoplifting (+45%), Anti-Social Behaviour (+17%), Robbery (+7%). Decreases were recorded in Drugs (-3%), Other Crime (-3%), Weapons (-4%), Burglary (-5%), Other Theft (-5%), Vehicle (-7%), Criminal Damage/Arson (-7%), Violence and Sexual (-9%), Bike Theft (-12%), Theft from a Person (-14%), and Public Order (-24%).

During 2024 the recorded crime has decreased by 6%. There was an increase in Shoplifting (+30%), Anti-Social Behaviour (+16%), Other Crime (+12%), Drugs (+2%). Decreases were recorded in Theft from a Person (-26%), Public Order (-23%), Burglary (-16%), Robbery (-16%), Vehicle (-11%), Bike Theft (-11%), Violence and Sexual (-10%), Other Theft (-10%), Criminal Damage/Arson (-7%) and Weapons (-6%).

During 2025 the recorded crime has decreased by -6%. There was an increase in Anti-Social Behaviour (+20%), Drugs (+19%), Shoplifting (+5%), Weapons (4%). Decreases were recorded in Burglary (-16%), Other Theft (-15%), Vehicle (-14%), Robbery (-12%), Public Order (-10%), Bike Theft (-8%), Theft from a Person (-8%), Other Crime (-6%), Criminal Damage/Arson (-4%) and Violence and Sexual (-2%).

7.4.3 Analysis of Recorded Crime Levels – Rail stations and Car Parks

During 2024, there were 1604 offences recorded in the areas covered by the CCTV systems. In 2025, the number of offences has increased to 1961 occurrences. Birmingham New Street was the main location for offences with 1080 incidents. The category of offences for each location can be found in Appendix 'A'. Without a more detailed analysis it is difficult to establish if the CCTV has had positive effect and it will be necessary to monitor and evaluate the system over the next 12 months.

7.5 Support Indicators

7.5.1 Incident Reports - 2021 to 2025

The success of a CCTV scheme relies, to a considerable extent, on the pro-active use of the system by the operators. This sophisticated technology is primarily a passive device and without human interaction it relies on an incident occurring within its field of view, this is the case even when on automatically programmed patrols.

West Midlands Combined Authority CCTV Evaluation - Rail Stations and Car Parks
1st January – 31st December 2025
British Standard 7958 Evaluation

It is necessary therefore to ascertain if the system is being used to its full potential by those operating the cameras and one method of establishing this is to analyse the Incident Reports. Details of incidents dealt with by Operators are passed to the relevant authority. Incidents are not always responded to immediately by the Police, but are monitored and recorded by Operators on their behalf.

7.5.2 Analysis of Recorded Incidents

It is necessary to be able to justify the existence of each camera which forms part of the CCTV scheme and the only measurement is when it has been used during an incident.

It should be explained that when monitoring of an incident, it is normal practice to use a number of cameras and therefore the analysis will have no resemblance to the actual number of incidents. However, it will provide an indication of the usefulness of each camera to the overall system when dealing with incidents.

During 2021 the number of uses increased significantly to 1637 and this averaged out at 1 usage for each camera. During 2022 the number of uses increased again to 1974 and this averaged out at 2 usages for each camera. During 2023 the number of uses increased again to 3319 and this averages out at 2 usages for each camera. During 2024 the number of uses increased again to 3001 and this averaged out at 3 usages for each camera.

In 2025 the number of uses decreased to 2117 and this averages out at 3 usages for each camera. An analysis of the number of recorded incidents can be found in Appendix 'C'.

Using a formula employed by a number of Local Authorities, all cameras with less than half the average number of usages would be regarded as being 'at risk' of further consideration. Using a similar formula as described, during 2021 there were 740 cameras below half the average of 1 usage. During 2022, there were 722 cameras below half the average of 1 usage. During 2023, there were 90 cameras below half the average of 1 usage and these should be further investigated as to their continued justification. During 2024, there were 174 cameras below half the average of 1 usage and these should be further investigated as to their continued justification. In 2025, there were 163 cameras below half the average of 1 usage and these should be further investigated as to their continued justification. However, most of these cameras have specific and/or unique operational requirements, which include the security of staff and people using the station facilities.

West Midlands Combined Authority CCTV Evaluation - Rail Stations and Car Parks

1st January – 31st December 2025

British Standard 7958 Evaluation

Two of the primary purposes for the installation of CCTV into the locations under review are the prevention of offences and the protection of life and property. The low incident rate would tend to suggest that the individual CCTV systems are achieving the required outcomes. However, the reality is more complex, as the systems may form part of a package of crime reduction initiatives and techniques. Also, under reporting may contribute to the assumption that an initiative is achieving the required results.

7.5.3 Viewing and Seizure of evidence

The viewing and subsequent copying/seizure of recorded images can act as an indicator to support or refute the effectiveness of the scheme in obtaining meaningful evidence.

However, it is difficult, if not impossible to ascertain from police records whether the images viewed have been used as evidence to obtain a conviction at court, assisted in any other clearance process or been used for intelligence purposes.

During 2021, there were 115 reviews conducted by the police and this was a decrease of 1127 over the previous period. 81 DVD/CDs/USBs and 34 stills were issued to the Police and third parties. During 2022, there were 321 reviews conducted by the police and this was an increase of 206 over the previous period. 455 DVD/CDs/USBs and 66 stills were issued to the Police and third parties. During 2023 there were 252 DVD/USBs and 161 stills released to the Police. The following tables record the numbers of footage released in 2024 and 2025.

Police / other footage release 2024:

Organisation	Axon / DEMS	Disc	Evidence Locker	Stills	USB	Tesco Link	Grand Total
BTP	10	162	1	5	0	0	178
Police	89	7	0	4	14	0	114
HMRC	0	0	0	0	1	0	1
Rail Accident Investigation Authority	0	1	0	0	0	0	1
Chiltern Trains	0	1	0	0	0	0	1
West Midlands Trains	2	24	16	0	0	0	42
Solicitors	0	1	0	0	0	0	1
Insurance	0	0	0	0	0	2	2
Safer Travel	9	0	0	69	0	0	78
TfWM	0	1	0	0	10	0	11
Grand Total	24	196	17	78	15	2	429

West Midlands Combined Authority CCTV Evaluation - Rail Stations and Car Parks
1st January – 31st December 2025
British Standard 7958 Evaluation

Police / other footage release 2025:

Organisation	Axon / DEMS	Disc	Evidence Locker	Stills	USB	Grand Total
Police	1179	90	22	215	55	1561
TOC	19	1	0	0	0	20
WMCA	0	0	0	0	2	2
Insurance	0	1	0	0	0	1
TfWM	0	0	0	0	3	3
Grand Total	1198	92	22	215	58	1587

Generally, it would appear to indicate that the police are finding the CCTV systems useful and this is a positive support indicator.

7.5.4 Complaints

A member of the public wishing to make a complaint about the system may do so through West Midlands Combined Authority’s complaint procedure. A copy of the complaint procedure is available by writing to:

Customer Services
 West Midlands Combined Authority
 16 Summer Lane
 Birmingham, B19 3SD

A complaints process has been documented. A record of the number of complaints or enquiries received will be maintained together with an outline of the action taken. During the period of evaluation there have been no recorded complaints concerning the schemes in question.

7.5.5 Compliments

During the period of evaluation there have been nine compliments received from the Police and clients concerning the schemes in question. Trends identified: knowledge, support and helpfulness of the team.

7.5.6 Privacy Impact Assessments

Privacy Impact Assessments have been undertaken for any new cameras that have been installed or whereby the specification has been upgraded.

West Midlands Combined Authority CCTV Evaluation - Rail Stations and Car Parks
1st January – 31st December 2025
British Standard 7958 Evaluation

8.0 CONCLUSION AND RECOMMENDATIONS

8.1 Introduction

This camera evaluation focuses on the 767 public space Closed Circuit Television surveillance cameras installed on the rail stations and car parks monitored by West Midlands Combined Authority in their CCTV Control Room facility.

8.2 Recorded Crime

During 2021, there were 652 offences recorded in the areas covered by the CCTV systems. During 2022, the number of offences had increased to 841 occurrences. During 2023, the number of offences has increased to 1778 occurrences. Birmingham New Street was the main location for offences. During 2024, the number of offences has decreased to 1604 occurrences. Birmingham New Street continues to be the main location for offences. In 2025, the number of offences has increased to 1961 occurrences. Birmingham New Street continues to be the main location for offences. The category of offences for each location can be found in Appendix 'A'.

8.3 Recorded Incidents by CCTV Operators

During 2021 there were 482 incidents recorded by the CCTV operators, this increased to 586 incidents in 2022. During 2023 it increased further to 1056. During 2024 the number decreased to 1045 incidents with a further decrease in 2025 to 795 incidents.

In 2025 the number of uses decreased to 2117. The average number of incidents per camera during 2021, 2022, 2023 and 2024 was 1. During 2025, it remained the same at 1 incident per camera. There is now a total of 767 cameras installed on the rail stations and car parks.

The type of incidents can be found in Appendix 'B' and the number of camera uses for each camera can be found in Appendix 'C'.

8.4 Police Reviews of footage

Another important indicator is the number of reviews conducted by the police. During 2021, there were 100 reviews conducted by the police and this was a decrease of 179 over the previous period. 66 DVD/CDs/USBs and 34 stills were issued to the Police and 15 DVD/CD/USBs and no stills to third parties.

West Midlands Combined Authority CCTV Evaluation - Rail Stations and Car Parks
1st January – 31st December 2025
British Standard 7958 Evaluation

During 2022, there were 267 reviews conducted by the police and this was an increase of 167 over the previous period. 400 DVD/CDs/USBs and 65 stills were issued to the Police and 55 DVD/CD/USBs and 1 still to third parties.

In 2024 and 2025, the following was released to the Police and others:

Organisation	Axon / DEMS	Disc	Evidence Locker	Stills	USB	Grand Total
Police	1179	90	22	215	55	1561
TOC	19	1	0	0	0	20
WMCA	0	0	0	0	2	2
Insurance	0	1	0	0	0	1

Grand Total	1198	92	22	215	58	1587

Generally, it would appear to indicate that the police are finding the CCTV systems useful and this is a positive support indicator.

8.5 Future Evaluations

It has not been possible to provide an analysis which justifies continued use of each camera, due to the problems of extracting the relevant data from the management system. This is an area which needs to be addressed in order for meaningful evaluation of the system to be undertaken.

The Information Commissioner’s CCTV Code of Practice makes the following requirement;

“If you are already using a surveillance system, you should regularly evaluate whether it is necessary and proportionate to continue to use it”

“You should review regularly whether the use of CCTV continues to be justified. It is necessary to renew your notification with the ICO annually, so this would be an appropriate time to consider the ongoing use of such systems.”

...there should be a periodic review, at least annually of the system’s effectiveness to ensure that it is still doing what it was intended to do. If it does not achieve its purpose, it should be stopped or modified.”

Information Commissioners Code of Practice 2014

West Midlands Combined Authority CCTV Evaluation - Rail Stations and Car Parks
1st January – 31st December 2025
British Standard 7958 Evaluation

The purposes and scope of the systems are detailed in Section four of this report and these include the prevention and detection of offences. Whilst it is not possible to make an assumption that the CCTV system is actually preventing offences, it is a component part of the preventative package.

To remove or modify the use of the CCTV system may also detract from a further identified purpose, this being to reduce the fear of crime. It is therefore recommended that at present the system is effective in achieving its purpose, however, there is no current research available which would indicate the public or employees' perceptions and this is an area which could provide valuable information in future evaluations.

It is a recommendation that the West Midlands Combined Authority Rail CCTV systems continue to be evaluated on an annual basis. This will ensure future compliance with the British Standard, which is assessed each year, it will also provide compliance with legislation and ensure continuous measurement of fluctuations and monitoring for any emergence of life cycles, which could cause a decline in the initiative. CCTV evaluations are also required for compliance to the Surveillance Camera Code of Practice 2021.
